

### **Mariacristina Chiappetti Joins Dukosi's Senior Leadership Team as Head of Quality**

EDINBURGH, United Kingdom, 5 August, 2025 -- Dukosi Ltd, the technology company revolutionizing the performance, safety and sustainability of battery systems, today announced Mariacristina Chiappetti has joined Dukosi's senior leadership team as Head of Quality – further strengthening its focus on quality and the Automotive sector. With extensive experience in the automotive semiconductor and electronics industry, Mariacristina brings invaluable expertise in customer quality requirements, reinforcing Dukosi's commitment and strategic direction to deliver safe, reliable and trustworthy solutions across all the company's target markets.

Mark Pinto, CEO of Dukosi, said "We are delighted to welcome Mariacristina to the team and adding her extensive experience in the electronics industry and driving quality with a zero tolerance strategy. Her deep understanding of automotive standards, quality techniques, R&D methodology, and chip manufacturing processes will be instrumental in meeting customer quality requirements throughout the supply chain and customer journey."

With over 25 years of experience in the semiconductor industry, Mariacristina is a senior quality director who combines deep technical knowledge and customer experience management with strategic vision to drive company success in highly demanding environments, particularly within the automotive sector. Mariacristina has a strong command of semiconductor processes and quality methodology expertise, and a successful career in building trust by developing strong, coherent and consistent quality engagement to support customers. She holds a Bachelor of Science degree in chemistry and is the recipient of several certifications and awards in the Automotive industry.

Speaking of her new role, Mariacristina said: "I have been fascinated by Dukosi's commitment to innovation and the potential of the novel, safer, more efficient and sustainable solution Dukosi has developed to drive greener electrification. Dukosi's innovative cell-level monitoring solution is poised to transform the landscape of next-generation battery design, and I am absolutely energized by joining the Dukosi management team and the opportunity to shape and drive our quality strategy with our valuable customers. I'm looking forward to working with this agile and professional team at this pivotal time to help accelerate business growth, contribute to the company realizing its full potential and delighting our customers with best-in-class quality."

## **About Dukosi**

Dukosi develops revolutionary technologies that dramatically improve the performance, safety, and efficiency of battery systems, and enable a more sustainable battery value chain. The company provides a unique cell monitoring solution based on chip-on-cell technology and C-SynQ<sup>®</sup> communications protocol for electric vehicles (EV), industrial transportation and stationary energy storage markets. Headquartered in Edinburgh, UK, Dukosi has a global footprint with locations in USA, Asia and Europe.
